

EVERFLOWING SPRING

EVERFLOWING SPRING TET 33816 (Desire of Nations x Minnesota Nice) 6" (up to 6.5"), 36" (although varies by year from an average of 30" to average of 38"), 16 buds (range of 14-32), ML, Dor, Re (but only a small percentage outside in MN). Soft lavender pink with ivory pink watermark, pale yellow ruffled edge, and yellow to green throat. "Bouquet" bloomer (lots of blooms each day). Re-establishes and clumps quickly after planting. Fertile both ways, but always an "outside" plant so I've only recently been making seeds from it. See kids below.
