

TREMBLING HEART

TREMBLING HEART TET 24217 (sdlg x Fountain of Tears) 7", 27" (range of 21-33" in a given year; average was 24" when cold and no snow cover all winter and other years 30"), 15 buds (range of 8-33), ML, Sev, Re (but not seen outside in MN). Pink lavender; medium grape eye with ivory pattern; chartreuse throat. Its bold pattern is very showy from quite a ways. Wonderful in a clump. The flowers show a pattern over 90% of the time no matter what the temperature is here (which is very rare on plants with patterns in my garden). Fertile both ways. It has always been an "outside" plant so I only started to make seeds with it in 2023. See kids below.
